

Auth. Distributor

- HT PANELS
- LT PANELS
- VFD & PLC PANEL
- DG SYNCHRONIZATION PANEL
- IP55 OUTDOOR PANELS
- AUTOMATION PANELS
- BUS DUCT, CABLE TRAYS
- EXECUTION OF PROJECTS ON TURNKEY BASIS

SK ELECTRICAL PANEL MANUFACTURER is the premium, trustworthy, amongst the top custom-built switchboard manufacturers in INDIA . We are a quality-driven electrical solutions company that has achieved the highest standards of workmanship through perseverance to quality adherence. It has helped us earn many awards and accolades, establishing our name as one of the most trusted companies in this space.

We collaborate closely with our customers to deliver solutions that meet their specific needs and help them achieve their business objectives. We continuously evolve ourselves to keep up with the changing demands of our customers.

SK Electrical Automation

SK ELECTRICAL Started with a scratch in 2011 & now shortly Celebrating 13th year Anniversary. In last 13 years we have achieved many milestones.

Since the inception of our company, we have been backed and supported by a team of skilled professionals.

TECHNICAL AREAS OF WORK:

Consultation, turnkey contracting and Manufacturing all types of Control Panels.

GEOGRAPHICAL AREAS OF WORK:

Multistate, Uptil Now worked in Harayana, Delhi, Punjab.

TYPE OF INDUSTRIES SERVED:

Versatile existence, served all types of Automobile Companies & their ancillaries, forging Industries, Sugar Industries Distilleries, Chemical Industries, Hospitals, I.T. Parks, Foundries, Paint Shop Industries, Food Industries, Domestic Commodities, Open End Plant, Mink Plant, Polar Plant, Non wooven Plant Or Carpet Plant Factory, Solar Plant & Textile Plant.

Authorized Channel

SIEMENS
Ingenuity for life

Schneider
Electric

RR KABEL
WIRES & CABLES

INOVANCE

Rexroth
Bosch Group

POLYCAB

POLYCAB INDIA LIMITED

Advance SK Electrical

MILESTONE INSTALLATIONS:

- 11 KV, Transformer Substations upto 2500 KVA Capacity.
- 11 KV, Overhead Line & under Ground Cabling.
- D.G. Set Installations of Various Ratings. Maximum Multiple Installations At One Place Upto 2500 KVA
- AMF / Auto Synchronising / Auto Load Sharing Panel Installation.
- Supply of Relay Control Panel
- Flame Proof Electrical Installation Works.
- Complete Electrical & Instrumentation Installation For Hydrogen (H2) Manufacturing Plant.
- Complete Turn-Key Electrical Installation For Sugar Factory
- Complete Internal Electrification For Textile Like Open End Plant, Mink Plant, Polar Plant, Non wooven Plant Or Carpet Plant Factory.

There are still lot many installations to come in future, your's will be one of them

Why SK Electrical

We use innovative and inimitable design done only through computerized machine (CNC and Laser Machine based) and modern motorized tools.

- Bolted Design
- Nut Bolted Structure
- Fixed Structure

”

Fostering the requisite power solution, we ensure to maintain exceptional quality. With the aid of the latest machinery and cutting edge technology, our prime foci are always:

- Uncompromised Safety,
- Outstanding Quality,
- Maximized Productivity.

Vision:

To be a highly successful company in energy sector, to provide wide range of services to our customers and be the preferred contractor of choice.

Core Purpose:

To constantly work on innovative technologies thereby improving productivity, product quality and environmental safety.

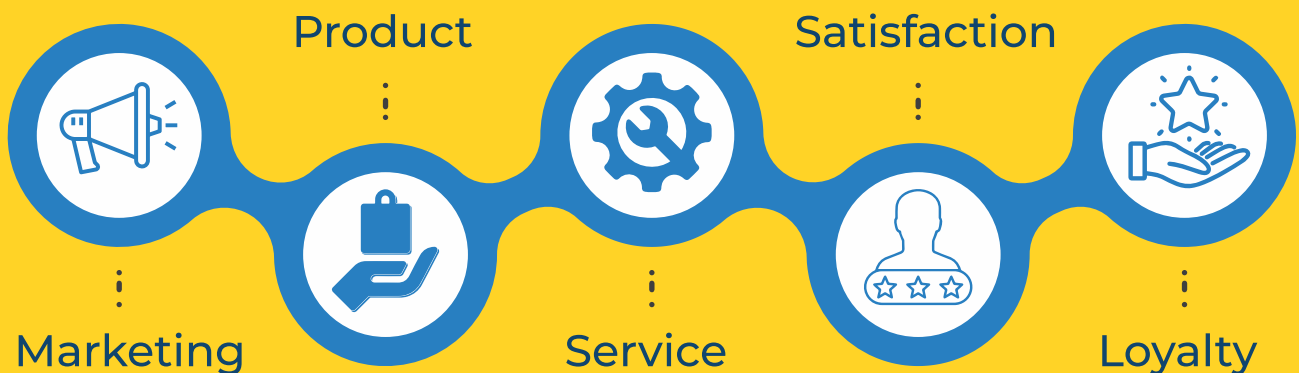

Mission:

To exceed our customer's expectations in quality, delivery, and cost through continuous development and customer interaction.

Quality for Sustainability

Service with a personal touch. Guaranteed!

Compact Substation

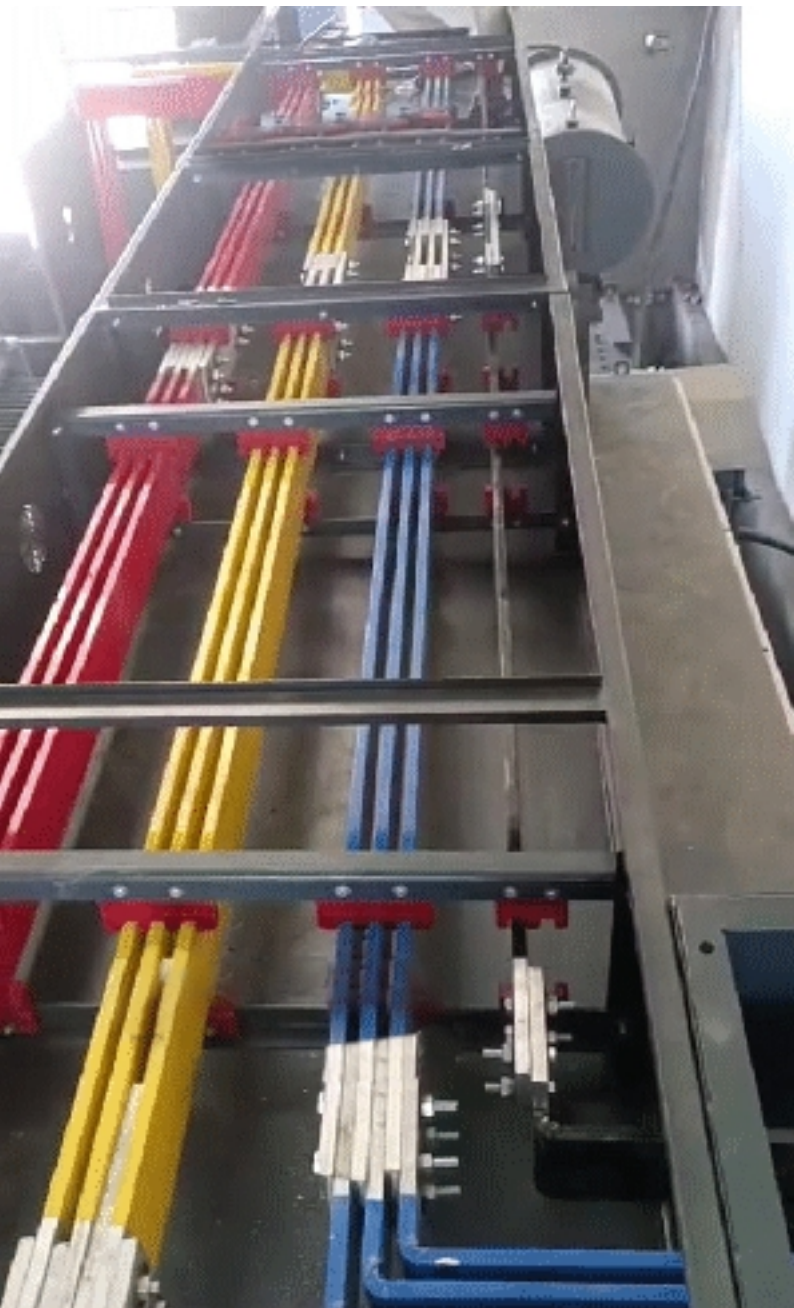

In secondary distribution networks, compact substations transform energy from MV to LV. Under specified service conditions, they are usually installed in public places and protect the general public.

Bus Ducts & Cable Trays

Transformers are connected to panels using bus ducts. Their use is limited to very high current ratings. The Bus Ducts we provide can be customized in size and rating based on requirements. These bus ducts are low on maintenance, have long operational life and offer high operability.

Cables should be laid in a proper and isolated manner in any industry. Besides the painted and powder-coated versions, we also produce GI and MS powder coated types of cable tray..

HT PANELS (VCB PANELS)

11 KV VCB PANEL

As a distinguished 11 KV VCB panel supplier, SK make easy packed Schneider 11 KV indoor type panel and 11 KV panel switchboards. The highest system voltage is rated at 11 KV and operational current at 1250A. The Ingress Protection or IP rating for external-compartment in indoor is IP-4X and outdoor is IP-55 while that of internal compartment is IP-2X.

11 KV VCB L&T PANEL

As a distinguished 11 KV VCB panel supplier, SK make L&T 11 KV indoor type panel and 11 KV panel switchboards. The highest system voltage is rated at 11 KV and operational current at 1250A. The Ingress Protection or IP rating for external-compartment in indoor is IP-4X and outdoor is IP-55 while that of internal compartment is IP-2X.

DG SYNCHRONIZATION PANEL

It is the CONTROL & RELAY PANELS. They help to control and monitor the faults wherever installed.

Panels can be communicated with the different SCADA Programs , PC's , Servers etc. The high quality PANEL assures the safety of the sub-station and also the continuous and uninterrupted flow of current.

IP55 OUTDOOR PANELS

Are you thinking outdoor panels ? Don't Worry , we got you covered. With the advanced machinery and the latest design modifications now we can provide all the panels for outdoor use as well without the hint of any dust or water damage to components.

LT/PCC panels change LT Panels

Power Control Center (PCC)

PCC is the main control point of any industrial or commercial establishment. Providing the latest technology and solutions for PCC according to customer requirements is our forte.

DG Synchronization/AMF/ Load Management Panels

Auto Mains Failure (AMF) is used for auto-switching between mains power supply and generators to ensure there's zero power nag between the mains supply and DG. These panels are mostly used in hotels and commercial establishments. NK's AMF panels come along with PLC and Relay based solutions as per the customer's requirement.

APFC / Power-Factor / Copacitor Panels

By switching the capacitor banks via contractors or transformers, our Power Factor Panels can help you control the power factor, ultimately saving you money on your electricity bills.

Motor Control Center (MCC) Starter panels

A motor control centre panel provides control over several motors from a single source. Motors can be varied according to their load. The MCC Panel consists of DOL starters, Star Delta starters, and drives that are protected and safe from voltage fluctuations or phase reversals.

VFD & PLC Panel

The control panels we produce use PLCs, as well as high-quality relay cards, sensors, couplers, etc. Our clients encompass companies in various fields, such as processing units, plastic manufacturers, shoe manufacturers, etc.

VFD Panel

The VFD Panel (Variable Frequency drive panel) also known as VFD Control Panel are designed to control the speed of the electric motor and feed pump. They are widely used in drilling, pumping and other large machine applications like Conveyor and Compressor.

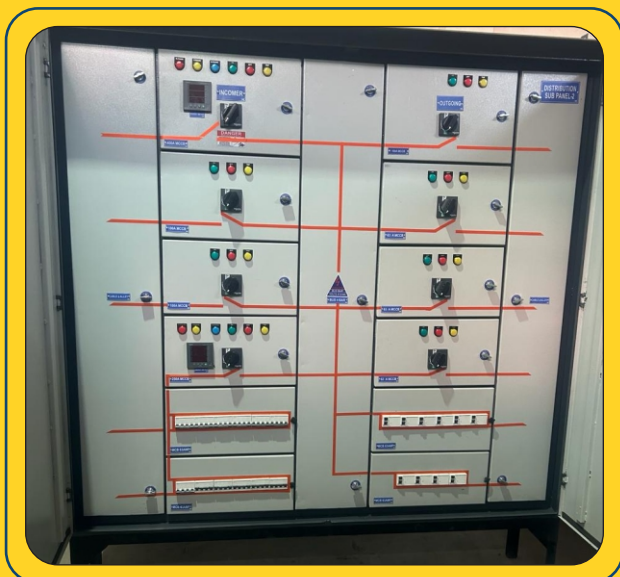

Fire Fighting Pump Panel

These are control panels containing electrical components such as circuit breaker, switches, relays and other devices dedicated to the operation of fire pumps.

Meter Box Panels

Metering panels are a kind of control panels that are very much required for the domestic as well as industrial purposes for the measurement of the amount of power used up and the rate of power consumption.

Distribution Panel

As a manufacturer and installer of lighting distribution boards, our product is used to distribute the electrical power for the lighting system of the plant or individual requirements.

PLANT & MACHINERY

CNC LASER CUTTING MACHINE

is a helpful in metal sheet cutting through CNC laser cutters. Our processing range in up tp 14 mm for high powered models. We provide laser cutting for any array of metal sheets such as Aluminium, copper, stainless steel, zintec steel, mild steel or pre-galvanized steel.

CNC HYDRAULIC SHEARING CUTTING MACHINE

is capable of craving any design on metal sheet with finest cleanness. Because of the greater clamping system, CNC hydraulic machine can work in the locating surface and can save a big amount of energy and cost.

CNC HYDRAULIC BENDING MACHINE

can bend metal sheet from a few mm to many meters long. This supreme quality machine saves up energy and time both and perfect for largest industrial uses.

SAND BLASTING SYSTEM

Sandblasting can remove paint, rust, and residue from oxidation from materials quickly and efficiently. Sandblasting can also be used to change the condition of a metal's surface, such as through removing... scratches or casting marks.

Sandblasting as a cleaning method has been widely used for over a hundred years.

MECHANICAL PRESSES

If you are looking for a powerful mechanical presses for a fast and quick application in manufacturing operation, our mechanical presses are the right solution. It can press and change the shape of a sheet in no time keeping all the safety measures as high priority.

CNC BUSBAR MACHINE

The Aluminium/Copper Busbar bending, cutting &

- punching machine is technologically advanced, compact & versatile machine.
- The busbar machine is designed to cater the requirement of bus bar preparation & almost all operations are included in one machine.
- This is a highly productive machine suiting to growing demand of Industries.
- The copper busbar bending cutting and punching machine is equipped with three different & independent stations for All these stations work parallel to contribute High Productivity of machine.
- International quality hydraulic & electrical components ensure maintenance free long life.

POWDER COATING

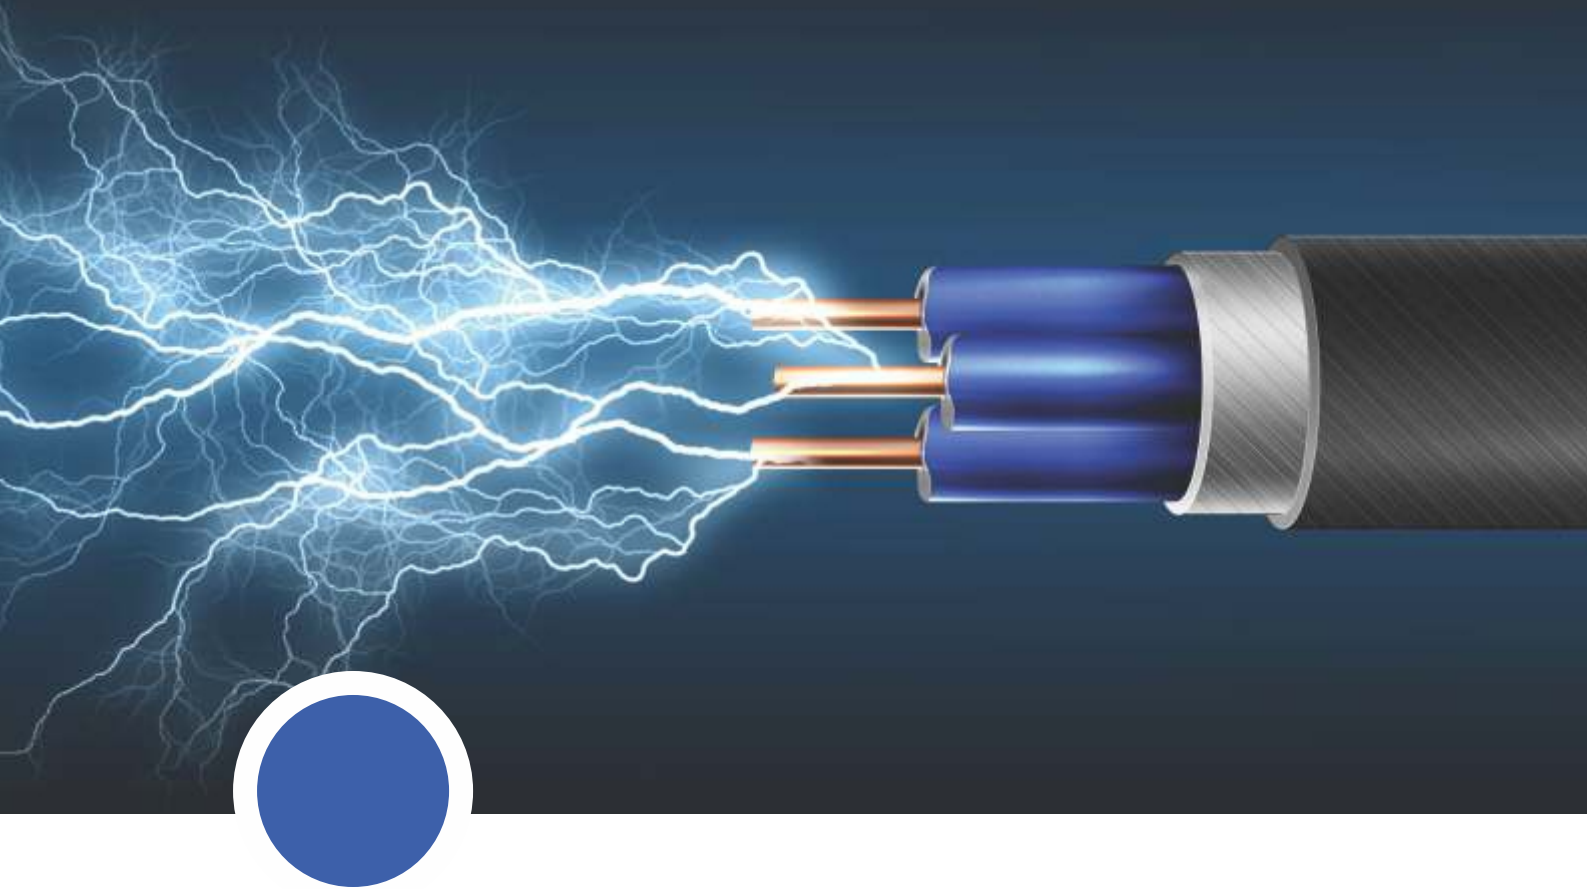

It is usually used to create a hard finish that is tougher than conventional paint. Powder coating does not have a liquid carrier, meaning it can produce thicker coating than conventional liquid coatings without running or sagging.

Certificates

We are a certified solution provider that abides by the highest standards of the industry.

Execution of Project on **Turnkey Basis**

We provide end-to-end turnkey projects that involve discussion with the client to understand their project to deliver the completed project on time. Our turnkey projects are carried out with utmost care to safety and quality, material and manpower planning, and designing and planning.

Project Consultancy

As an ace electrical solution provider, we also aid our clients with necessary consultation if required comprising the entire electrical work solution depending on the industry requisites

**Experience our excellence.
We are reachable Monday to Saturday at the
below-mentioned numbers.**
